I am an Unity Game Developer who loves building fun and realistic mobile games. I enjoy turning simple ideas into full playable experiences and always focus on smooth gameplay and good performance. Game dev isn't just my work — it's what I genuinely enjoy doing every day.

## Experience

### Freelance Game Developer

August, 2022 - Present

- Developed a WebGL crypto-based Penalty Shooter game using **Mirror Networking** and Edggap servers for **Real-time multiplayer** functionality
- Worked with NightScream Studio, helping fix gameplay and performance bugs in their released titles
- Worked with various clients on Unity projects, focusing on performance optimization, smooth network synchronization, and polished gameplay across web and mobile platforms

### Adventurous Mind Games - Lead Unity Developer & Founder

September, 2023 - Present

- Developed **Indian Tractor Off-Road**ing, achieving **90,000+ downloads** on Google Play.
  - Specialized in vehicle systems using Unity C# and Vehicle Physics for realistic driving physics.
  - Created intelligent **AI traffic systems** including lane logic, obstacle detection, and dynamic pathfinding.
  - Integrated **AdMob ads** (rewarded, interstitial, banner) and **Unity IAP** with restore purchase support.
  - Created custom **Unity Editor Tools** to streamline development workflows.
- (Actively working as a Freelance Unity Developer while also leading development at Adventurous Mind Games.)
